CINCINNATI, WEDNESDAY MORNING, MARCH 28, 1860.
PRICE ONE CENT.

VARIETIES.

Two of John Brown's daughters are at-
tending school at Concord, Mass.

Sparrows half-dollars and quarters are float-
ing about Richmond, Virginia, by wholesale.

Upward of a hundred wells for oil have
been bored in the Ohio Creek and Allegheny
River, in Pennsylvania.

A profound intellect is weakened and nar-
rowed in general power and influence by a
limited range of sympathies.

The United States storeship Supply and
Palmouth will leave in a few days for the
Gulf of Mexico, with stores for the squadron.

Snow at Rochester, New York, on Thurs-
day night, was eleven and at Lyons eight
inches, causing considerable delay to trains.

Tom Corwin is suggested by the New York
Commonwealth, as likely to receive the
Congress nomination. Very doubtful.

The Postoffice business of Worcester, Mass.,
is larger than that of any other city or town in
the State save Boston.

It is reported that A. T. Stewart, the great
New York dry goods merchant, has become
insane.

The greatest sacrifice a fashionable young man
of the nineteenth century can make is that
of the mustache.

Najah Taylor, President of the New York
Bank for Savings, died in Brooklyn, N. Y.,
on Friday, in the ninety-first year of his age.

The force of Utah is to be reduced to three
companies of artillery and four of infantry,
under command of Col. P. St. George Cooke.

There are, in Buffalo, N. Y., fifty Protest-
ant Sunday Schools, nearly nine hundred
teachers and three thousand three hundred
scholars.

It is stated that a man near the Skaneateles
(N. Y.) juncture employed boys and furnished
them with shotguns and during one day
killed over 12,000 pigeons.

A picker up of loose coal in the streets of
New York recently purchased a farm near
the city for \$60,000, and retired from business.

The war with Morocco is estimated to have
cost Spain \$25,000,000 and fifteen thousand
lives, which she has conquered a city not
worth the keeping.

The negro question threatens to break up
the University of Mississippi, at Oxford, in
that State. At last dates the Faculty and
Trustees and Students were all by the ears.

John Lubbock, the author of the
"History of the Dutch Republic," has been
elected member of the French Academy of
Sciences, in place of Mr. Prévost.

Some excitement exists in Tioga County,
(Penn.) in consequence of the action of the
authorities who have ordered a tax upon cats
and dogs.

The quarrel between Capt. Meigs and Sec-
retary Floyd appears to have been settled.
The Secretary awarded a contract for marble \$300,
000 above the lowest bid.

A large and beautiful schooner, a native of
the banks of Newfoundland, was caught in
Pennacook the other morning, the first of
the kind ever taken there.

A fellow, calling himself Robert Beckett,
recently married an Irish servant girl in Buf-
falo, N. Y., borrowed \$20 of her and ran away.

The Jeffersonville (Ind.) people are much ex-
cited, and have been holding mass meetings,
concerning the labor of the convicts of the
penitentiary in that city.

Our naval forces in the Gulf of Mexico con-
sist of two steamers and three sloops, carry-
ing one hundred and twenty-two guns and
one thousand five hundred men.

The "Times" are quoted in Montpelier, Vt.,
as to be as hard as 1857-8. The cause is sup-
posed to be in the farmers' keeping back their
produce.

The Worcester (Mass.) Spy says that George
Roberts has commenced suit against Mr. Je-
cob Barrow, for infringement of copyright, in
playing "The Octoroon," in that city.

A subscription is being raised in London
to send a person to the scene of the Hun-
garian revolution, to be the body of one of
the lost and bring it home for burial.

A woman who went about the streets in
New York, picking up coal from the ashes
recently died, and several thousand dollars
in gold and silver were found among her
effects.

The fire companies of Montreal have voted
to turn out on the occasion of the Victoria
Bride celebration, to offer prizes for the best
engine, and to have a torchlight procession
and a ball.

ANOTHER DIAMOND WEDDING DUEL IN PRO-
SPECT—AN ENRAGED FATHER-IN-LAW IN AN
EDITOR'S SNAKE.

It is rumored, say Saturday's New York
Evening Post, apparently on good authority,
that Lieut. Bartlett, the father-in-law of Sen-
ator Orville, who has been for some time prominent
before the public in connection with the
wedding of his daughter and the affair of honor
with Mr. Steinman, has been so highly in-
censed by a recent article in the Home Journal
that he has demanded satisfaction.

The article in question was with reference
to the reported engagement and approaching
marriage of a distinguished foreigner, in which
the hope was expressed that the approaching
wedding would not be such an affair as the
famous diamond wedding, and an adjective
was applied to the latter by no means com-
plimentary.

It is said that Mr. Bartlett, on reading the
article in question, went to the office of the
offending journalist in a high state of excite-
ment, and, encountering the editor, asked an
explanation; but not receiving an apology,
declared that he would demand immediate
satisfaction, and went off in high dudgeon.

When our informant last heard of the Lieuten-
ant he was in search of a friend, and it is
probable that a hostile message has already
been sent to the quiet sanctum of the Journal.

Amusing Mistake—A Minister Asked to
Lose a Hoop Skirt.

A well-known minister of Chelsea, Mass.,
was greatly surprised, some time since, at
receiving an epistle from a lady friend at Cape
Ann, containing two letters, one of which was
relative to her approaching marriage, and an
urgent request to send immediately a
"hoop skirt." The minister was com-
pulsed to comply, and a strange epistle
for him to receive, but there was the end of
the matter.

In the course of the day, however, the mys-
tery was cleared up, and it appeared that the
fair correspondent had mistaken the minister
for the Reverend, requesting his presence
to the marriage knot, and the other to a fe-
male friend, enlarging on the anticipated
occasion with reverence and diversifica-
tion, and highly interesting article, a hoop
skirt for him to receive, but there was the end
of the matter.

By some hoax-pieces the letters were placed
in the wrong envelope, but luckily the right
owners eventually exchanged letters, and the
minister and hoop skirt were both there.

ROMANTIC FRENCH DUET—A BEAUTIFUL
ROMANCE OF COURTESY AND CALUMNY.

A Frenchman of the town of Chantilly, in
France, some weeks since, "About noon sev-
eral gentlemen alighted from a down train at
the station of that town, and immediately
proceeded to the forest. One of the seven,
probably a surgeon, remained in the train, and
behind, while the others advanced into the
wood, and a duel with swords began. At the
fifth pass, M. de M.—fell seriously wound-
ed, and thrust through the body. Both antag-
onists are persons of note, and the wound-
ed man was removed to the Hotel d'Angleterre,
and there remains in a dangerous state.

Serious rumors are abroad as to the cause of
the encounter, and it is stated that the
gentleman alighted from a down train at the
station of that town, and immediately
proceeded to the forest. One of the seven,
probably a surgeon, remained in the train, and
behind, while the others advanced into the
wood, and a duel with swords began. At the
fifth pass, M. de M.—fell seriously wound-
ed, and thrust through the body. Both antag-
onists are persons of note, and the wound-
ed man was removed to the Hotel d'Angleterre,
and there remains in a dangerous state.

DISCOVERY OF AN IMPORTANT LIGHT—"Mal-
about" the Paris correspondent of the New
York Times, writes that scientific men have
been employed there for some time in seek-
ing an artificial light for the exploration of
the cavities of the human body. The diffi-
culty in the problem was to find a light
that produced no calorific light which might
be condensed in tubes of small dimen-
sions, and which produced a white flame.
Messrs. Dubouche and Dubouche, who have
been employed there for some time in seek-
ing an artificial light for the exploration of
the cavities of the human body. The diffi-
culty in the problem was to find a light
that produced no calorific light which might
be condensed in tubes of small dimen-
sions, and which produced a white flame.

culty in the problem was to find a light
that produced no calorific light which might
be condensed in tubes of small dimen-
sions, and which produced a white flame.
Messrs. Dubouche and Dubouche, who have
been employed there for some time in seek-
ing an artificial light for the exploration of
the cavities of the human body. The diffi-
culty in the problem was to find a light
that produced no calorific light which might
be condensed in tubes of small dimen-
sions, and which produced a white flame.
